

October 30, 2009

Dear Doctor:

I'm pleased to announce our next seminar "Treatment Planning of the Edentulous Maxilla – Fixed VS Removable Implant Prosthesis". This seminar will take place on Wednesday, November 18, 2009. The first seminar in this series was devoted to the mandible and received rave reviews for the speaker and his content. This seminar will focus on the maxilla. You did not have to attend the first seminar in order to attend this seminar. This seminar is by invitation only.

Our speaker is Dr. Joseph Carpentieri. Dr. Carpentieri is a clinical instructor at NYU School of Dentistry and in private practice in New York.

This evidence-based presentation reviews the difficult and complex aspect of the decision making process with a step-by-step approach and specific guidelines to determine fixed vs removable prosthesis. In an effort to bring the best possible topics and speakers, this seminar will be presented as a "live" webinar. Dr. Carpentieri will present his topic while in New York.

Please mark your calendar and send in the attached registration form to reserve this date. Thank you for your continued support and please call me if you have any questions regarding this outstanding continuing education program.

**In order to provide continued quality service, please include your Academy of General Dentistry member number on the Registration Form. This will allow our office to submit CE credits to the AGD for our course attendees.**

Sincerely yours,

Timothy P. Walsh, D.D.S.
