

January 20, 2009

Dear Doctor:

I'm pleased to announce our next seminar "The Oral Health-Systemic Health Connection: A New Responsibility for Dentistry" on **Tuesday, March 24, 2009** at the LaGrange Country Club in LaGrange, IL. Please note the date for this seminar has been changed from March 18th as previously noted. This seminar is by invitation only.

Our speaker is Dr. Ray Williams. Dr. Williams is the former Chairman of Periodontics at North Carolina School of Dentistry. He is currently the Dean of the Dental School at State University of New York, Stony Island, New York. For your information, a large number of periodontal disease/systemic disease health studies came from Dr. Williams' department at North Carolina. He is one of the leaders in this groundbreaking research.

Seminar topics include the historical perspective of oral infection-oral sepsis being linked to systemic disease causation, the link between chronic periodontitis in adults and cardiovascular disease and the new role of dentistry in ensuring overall health through good oral health. Please mark your calendar and send in the attached registration form to reserve this date.

I have also included the date of our final program of the year. On Wednesday, April 22, 2009, Drs. Robert Pick and David Newkirk will be discussing "The Perio-Restorative Connection". Please note this seminar will run from 5:00p.m. – 9:00p.m.

Both of these programs should be outstanding. Thank you for your continued support and please call me if you have any questions regarding these outstanding continuing education programs.

In order to provide continued quality service, please include your Academy of General Dentistry member number on the Registration Form. This will allow our office to submit CE credits to the AGD for our course attendees.

Sincerely yours,

Timothy P. Walsh, D.D.S.
