

August 12, 2011

Dear Doctor:

Welcome to the 22nd year of our continuing education study club. I'm pleased to announce our first seminar "Precision, Productivity and Profitability of Implant Overdentures and Implant Retained Partial Dentures" on September 21, 2011 at the LaGrange Country Club in LaGrange, IL. This seminar is by invitation only.

Our speaker is Robert C. Vogel, D.D.S. Dr. Vogel is the inventor of the increasingly popular "locator attachment". He is the world's authority on all things "locator attachment". This seminar features a systematic approach to diagnosis and treatment of the fully and partially edentulous patient with removable prosthesis including overdentures and implant retained removable partial dentures. Scientifically based tips, tricks, techniques and controversies will be presented to assure long-term success with precision, productivity and profitability in today's economic climate.

Please mark your calendar and send in the attached registration form to reserve this date. Thank you for your continued support and please call me if you have any questions regarding this outstanding continuing education program.

In order to provide continued quality service, please include your Academy of General Dentistry member number on the Registration Form. This will allow our office to submit CE credits to the AGD for our course attendees.

Sincerely yours,

Timothy P. Walsh, D.D.S.
